Finding Equivalent Fractions Using a Fraction Wall

Use the fraction wall to find equivalent fractions. Line up the lengths, then write the missing numerator. Tip: Use a ruler or paper edge to help line things up.

1. $\frac{1}{2} = \frac{\square}{6}$

2. $\frac{1}{5} = \frac{\square}{10}$

3. $\frac{2}{3} = \frac{\square}{9}$

4. $\frac{2}{3} = \frac{\square}{6}$

5. $\frac{4}{5} = \frac{\square}{10}$

6. $\frac{1}{2} = \frac{\square}{8}$

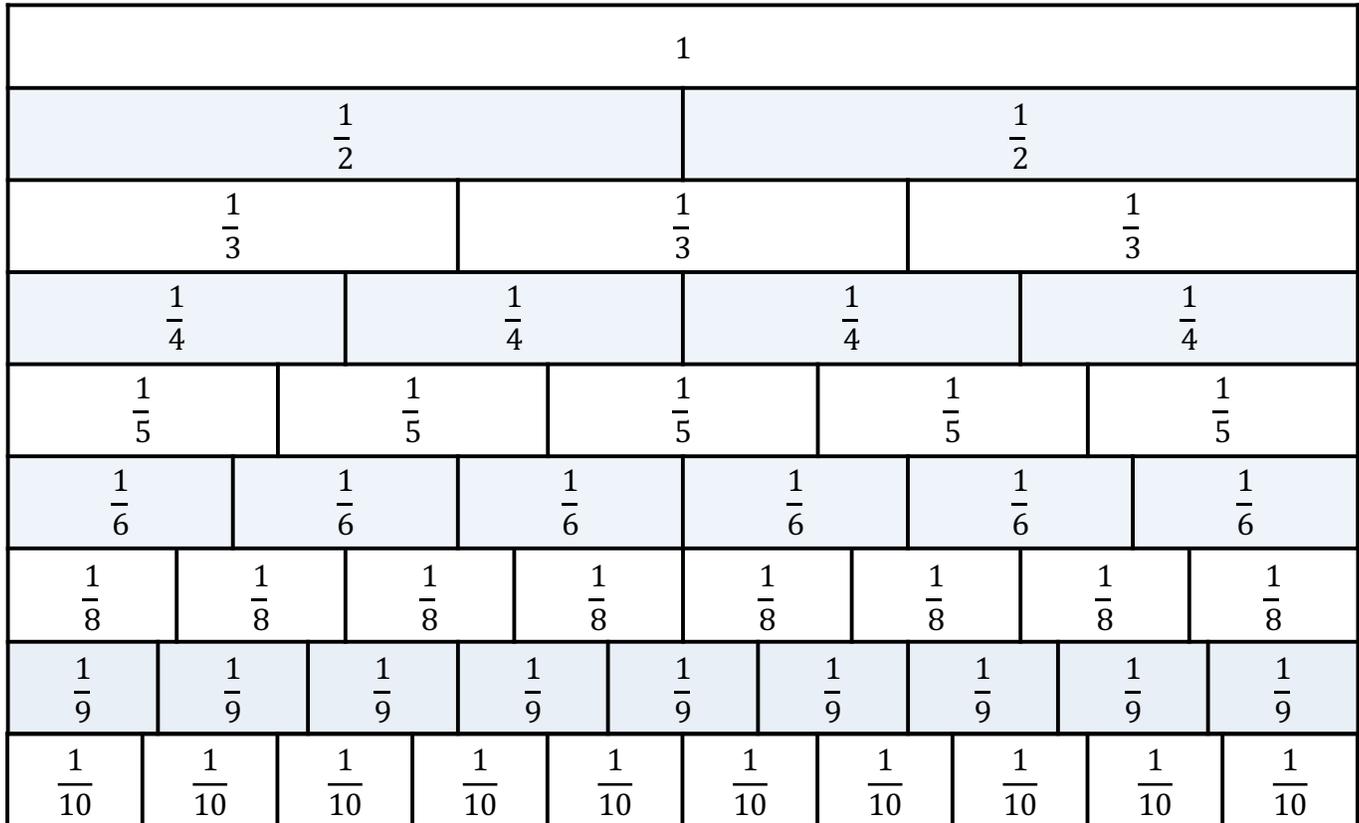

7. $\frac{3}{4} = \frac{\square}{8}$

8. $\frac{1}{4} = \frac{\square}{8}$

9. $\frac{3}{5} = \frac{\square}{10}$

Finding Equivalent Fractions Using a Fraction Wall

Use the fraction wall to find equivalent fractions. Line up the lengths, then write the missing numerator. Tip: Use a ruler or paper edge to help line things up.

1. $\frac{1}{2} = \frac{3}{6}$

2. $\frac{1}{5} = \frac{2}{10}$

3. $\frac{2}{3} = \frac{6}{9}$

4. $\frac{2}{3} = \frac{4}{6}$

5. $\frac{4}{5} = \frac{8}{10}$

6. $\frac{1}{2} = \frac{4}{8}$

7. $\frac{3}{4} = \frac{6}{8}$

8. $\frac{1}{4} = \frac{2}{8}$

9. $\frac{3}{5} = \frac{6}{10}$
